

# REACH Performance that will redefine your expectations of folding bicycles

## A different breed of folding bicycle

Reach is a performance 20-inch wheel bicycle with full folding and suspension features. It is fast, rigid, light and comfortable for both short and long trips. The wheel base, riding position, etc. are basically identical to full-size bicycles and the smaller wheels actually make starting up much easier.

A plush front and rear suspension system neutralizes vibrations and improves control. Reach is available in different configurations for different riding styles and environments.

### Features

- Unified rear triangle
- Unique Trailing Link front suspension
- Alu 7005 strong and light frame
- Easy-to-fold in seconds without tools
- Wide freewheel range, gear ratio up to 5.77

### Specifications

- Frame:** Alu 7005 Suspension Foldable Frame  
**Fork:** Alu 7005 Trailing Link Suspension  
**Weight:** 21lb (9.6kg)  
**Packing:** 3.8 cuft (74cm x 23cm x 64cm)  
**Wheels:** 20"-451 front and rear  
**Drivetrain:** Front: 53/39T or single chainring  
Rear: 8 or 9 speed  
**Brakes:** Caliper or V-brake

Partially folded

Completely folded

Quick-release rear shock complements front suspension for a smooth ride

## No-compromise 7005 frame design

Our dedication to providing a quality riding experience is reflected in the choice of materials, workmanship and streamlined frame design of Reach. When designing this frame, we wanted to depart from the traditional folding bike frame mentality and provide something that looks and rides like a full-scale bicycle, with the convenience of a folder.

## Easy to fold, a joy to ride

Reach uses a folding pivot that is located low on the frame, close to the bottom bracket. This allows for a compact folding design without sacrificing frame stiffness and strength during the ride. The quick release front wheel is removed first, allowing the rear wheel to swing up under to take its place...in seconds. The light aluminum frame makes it easy to carry.

An optional rear carrier rack is available

Capreo hub and freewheel combined with an Ultegra derailleur provide optimized gearing ratio on 26" wheels

Fast, rigid, light, comfortable

## Built-in Pacific quality

We have worked hard to maintain our reputation as a leading provider of high-end bicycles, and as a result the Pacific Cycles name has become synonymous with quality.

## Revolutionary Trailing Link Suspension

Offers sensitive, responsive performance that translates into superior handling and comfort during the ride. Unique elastomer-filled joints form a linkage that operates independent of braking forces and will never "dive" even during heavy braking, or bottom out when the going gets rough. As this is not a spring or air chamber-based design, it is extremely durable and offers a zero-maintenance solution.

20mm of plush travel improves both comfort and handling
